

#FriendsOfLISD

#FriendsOfLISD is a social media campaign to encourage positive communication between the school and home. We encourage our families and community members to join us by working together when an issue arises by contacting the teacher, coach, sponsor or administrator via a phone call, e-mail or by scheduling an appointment to meet to discuss the issue. While social media platforms can help us distribute information about our campuses and district quickly, there are times when information sent out by others not employed by the district is inaccurate or even untrue. When false information circulates, it can cause a disruption to the educational environment.

This is where you can help us. If you have a question or concern about an issue regarding your child, or you have a concern that needs to be brought to our attention, please allow us the opportunity to answer or clarify the issue. This method of communication helps tremendously as many of the questions or concerns can be addressed firsthand instead of circulating on social media through posts or reposts. While school employees can't share confidential information regarding other students, staff, and in some cases certain protected issues that arise due to state and federal law, we can talk to you about your child or about a concern you have that you need to bring to our attention.

We believe the school is the heart of our community, and while we have many great things going on at our campuses on a daily basis, we also understand the importance of communicating when issues do arise that need to be addressed. Please support #FriendsOfLISD by helping us all to better communicate and make a positive difference each day.
